

Step 1:

Connect to MongoDB (it is connected to A3)

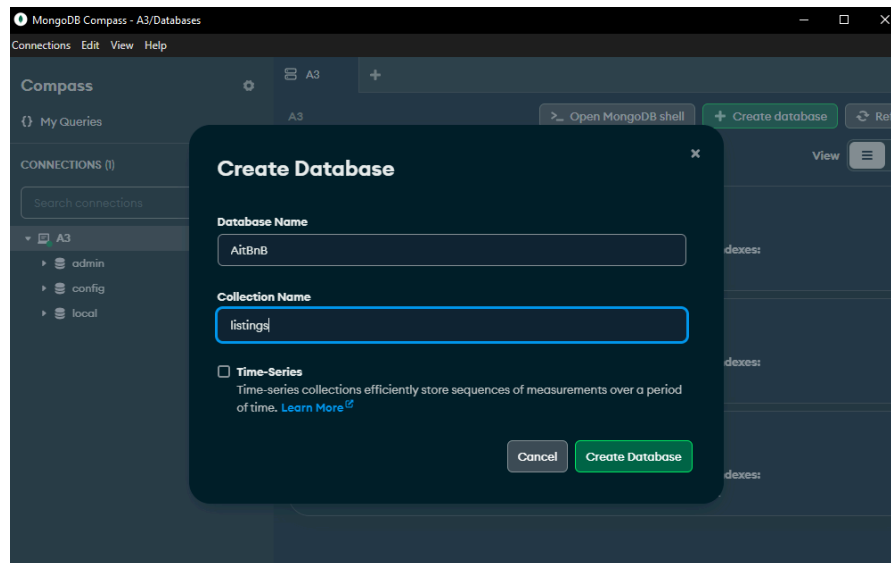

Step 2: find '+' sign to create database

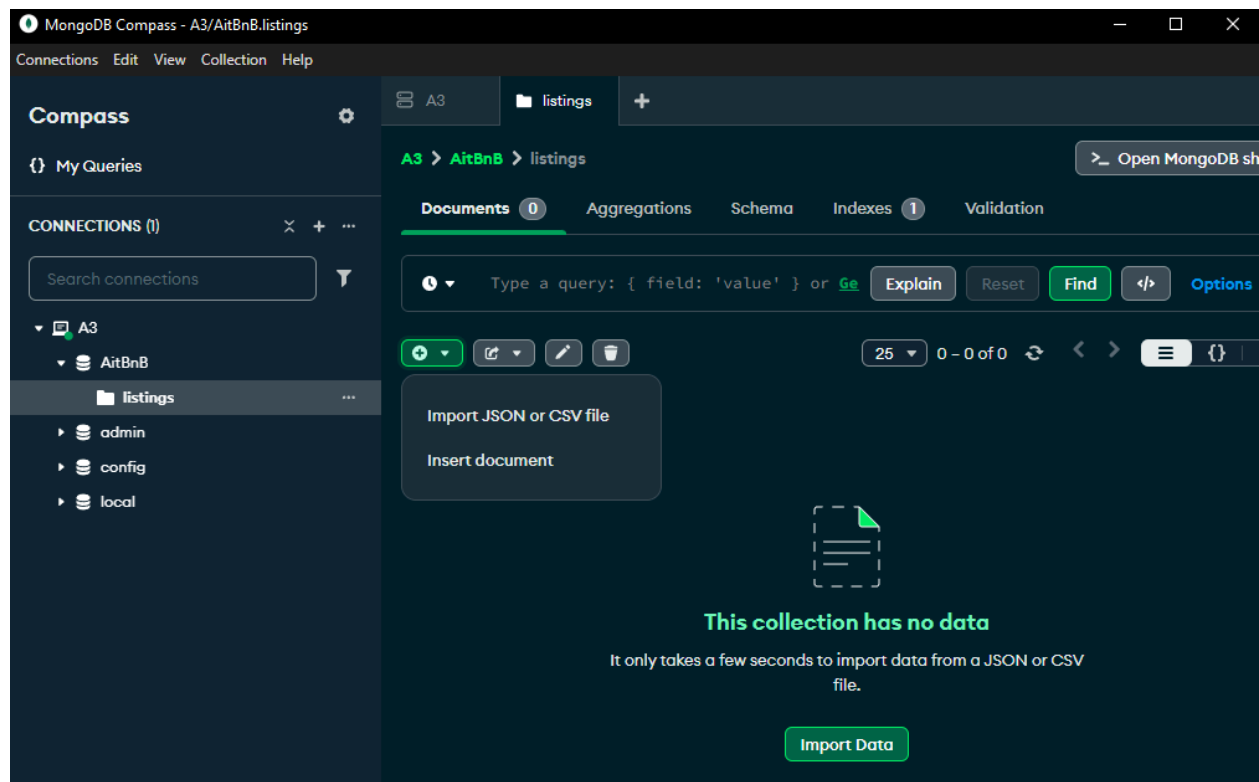

Step 3: input the name of database and the collection name

(we use “AirBnB” as database Name and “listings” as Collection Name)

Step 4: look into listings collection just created and find the green '+' sign

Step 5: select import JSON or CSV file then find where the import csv file or JSON file located at the PC then select import

Import

To collection AitBnB.listings

Import file: listings.csv

Options

Select delimiter: Comma

☒ Ignore empty strings

☐ Stop on errors
